

# DEATH BY MISADVENTURE THE GREEN PAJAMAS

*Death By Misadventure* is built around the epic song cycle, "The Fall of the Queen Bee," a peculiar assortment of songs taking place in her kingdom, Colony, including the ultimate death of The Queen and her court by decadent misadventure. The Story of Her Most Royal Majesty is aptly illustrated in the indulgent short film, *The Queen Bee Is Dead*. This is, of course, a fictional work, and any resemblance to real people living, dead or otherwise, is completely true.

A worldly darkness prevails throughout this record, though occasional shards of light break through with songs like *Carrie* and *Supervirgin*, which continue the age-old tradition of melodic Green Pajamas pop songs.

*Death By Misadventure* marks the thirtieth album/EP by The Green Pajamas. Toss in *The Goblin Market* and some Jeff Kelly solo albums – that's a splendid body of work by Seattle's longest running, most prolific band. *Death By Misadventure* is a fine new chapter in the grand drama.

### Recent Press for *Green Pajama Country!*

'Bleak but poetic, suffused in death, drama, cigarette smoke and whisky, these songs are a very long way from Green Pajamas' terrific psychedelic sounds, but Kelly's lyrics and these gripping deliveries make you wonder what took them so long to get to what seems another -- if very different -- natural home.'

Graham Reid - [Elsewhere](#)

*Country!* is ... 'about tapping into the way "country" exists in our brains and in our memories, how we tie it in with the album covers and TV shows of our childhood. Kelly and his band ... approach "country music" as a state of mind, in that way presenting both an outsider's view of the genre and a very personal take on what country music means.

Dave Heaton - [Pop Matters](#)

'This has the band tackling, yup, country music but adding their own otherworldly slant to it and it's REALLY good. Believe it.' [Dagger](#)
