

# TO THE END OF THE SEA

## THE GREEN PAJAMAS

*To The End Of The Sea* is The Green Pajamas first new studio album since 2012's *Death By Misadventure*. For this album, Jeff Kelly went to his roots, re-embracing his love of 1960's pop. It takes much more of an organic approach to the recording process than his work of recent years. Jeff wanted to reach back to Pajamas albums like *Strung Behind The Sun* and *All Clues Lead To Meagan's Bed* and go with that sort of aesthetic again: sound effects, backwards guitars, lots of vocal harmonies, violin and cello.

The album tells the story of a lighthouse keeper, the mysterious woman he finds on his beach after a storm one night and what happens from there. Who is Juliet? Fallen from a star, a mermaid or maybe just a mysterious woman? It's a sort of a sci-fi romance micro-rock opera, seasoned with a pinch of the gothic. Most of the 18 songs are short, tied into two long medleys. Many were in fact recorded in that fashion, with one song running right into the next. Bang, bang and then on to the next song.

*To The End Of The Sea* is everything you've come to expect from a Green Pajamas album, great songs, great musicianship and titillating production. After 31 Pajamas albums, somehow it is still beautiful, somehow still mysterious.

"the killer tracks will have you tapping your feet and the tunes will worm their way into your head. But really, you're best off not thinking about things too much. Just accept that the moon is made of cheese and give *Death By Misadventure* a good listen, it's well worth it."
