

# THE GREEN PAJAMAS

*If You Knew What I Dreamed* – The Green Pajamas play the Jeff Kelly Songbook is a bit of an oddity. Originally released in 2007 as a 16-song download-only album on St. Brigid Records, it is now seeing broader release. The album was edited down to eleven songs by Kelly and remastered by GMR honcho Tom Dyer for limited edition (300 copies!) translucent green vinyl release on Sugarbush Records. Simultaneously, Green Monkey is releasing the new eleven-song version digitally world-wide. Green Monkey will also have the vinyl LP available through the GMR website. It is such a modern world!

*If You Knew What I Dreamed - The Green Pajamas play the Jeff Kelly Songbook* is an album culled from Kelly's 30-plus years of songwriting. This was previously released as a download only album with live-in-the-studio versions of songs from Kelly's solo albums as well as a few of the band's oldies and two new songs. This edition includes the previously unreleased, "Where Have All The Geniuses Gone." Recorded and mixed fast, these bang-it-out sessions (1 rock band + percussionist) have an exciting and spontaneous energy, the songs themselves being the focus, as opposed to elaborate production of other Pajamas albums. The sound quality is incredible and particularly dynamic. The stripped-down production, always incredibly powerful, emphasizes the power of Kelly's melodies, making this an album of understated beauty and an absolutely essential addition to his canon.

For completists, the original 16-song download album is still available at: <https://thegreenpajamas1.bandcamp.com/album/if-you-knew-what-i-dreamed-the-green-pajamas-play-the-jeff-kelly-songbook>

Jeff Kelly and The Green Pajamas have made over 30 albums in the last 30 years - a consistently intriguing body of work. They perform in public occasionally.

## Vital Information

Available on LP and download from quality stores or direct from GMR!
