

Band of Jays

Get ready for a musical treat this September 1st with Green Monkey Records digital release of the album "Hooks" by Band of Jays. This album offers a captivating blend of re-mixed and re-mastered tracks from the now retired debut album "Decadent Rituals," seamlessly interwoven with previously unreleased gems from 2021.

Julian's deep appreciation for the melodies of power pop and the catchiness of pop rock, his music resonates with listeners who love infectious hooks, layers of harmonies, and memorable choruses. His influences extend beyond the realm of artist like Jason Falkner, The Posies, and Jellyfish, as he also finds inspiration in the timeless melodies of Motown music.

A rich fusion of genres and a melodic prowess that defines Band of Jays, "Hooks" makes this a must-listen experience with an early primordial feel to the band's signature sound.
